**AMERICAN
BAGGER**

RAVENOUS

A DOUG MCGOON 30" WHEEL RIDES ON THE FRONT WITH A MATCHING 18" ROTOR AND A PERFORMANCE MACHINE SIX-PISTON CALIPER PROVIDING THE STOPPING POWER.

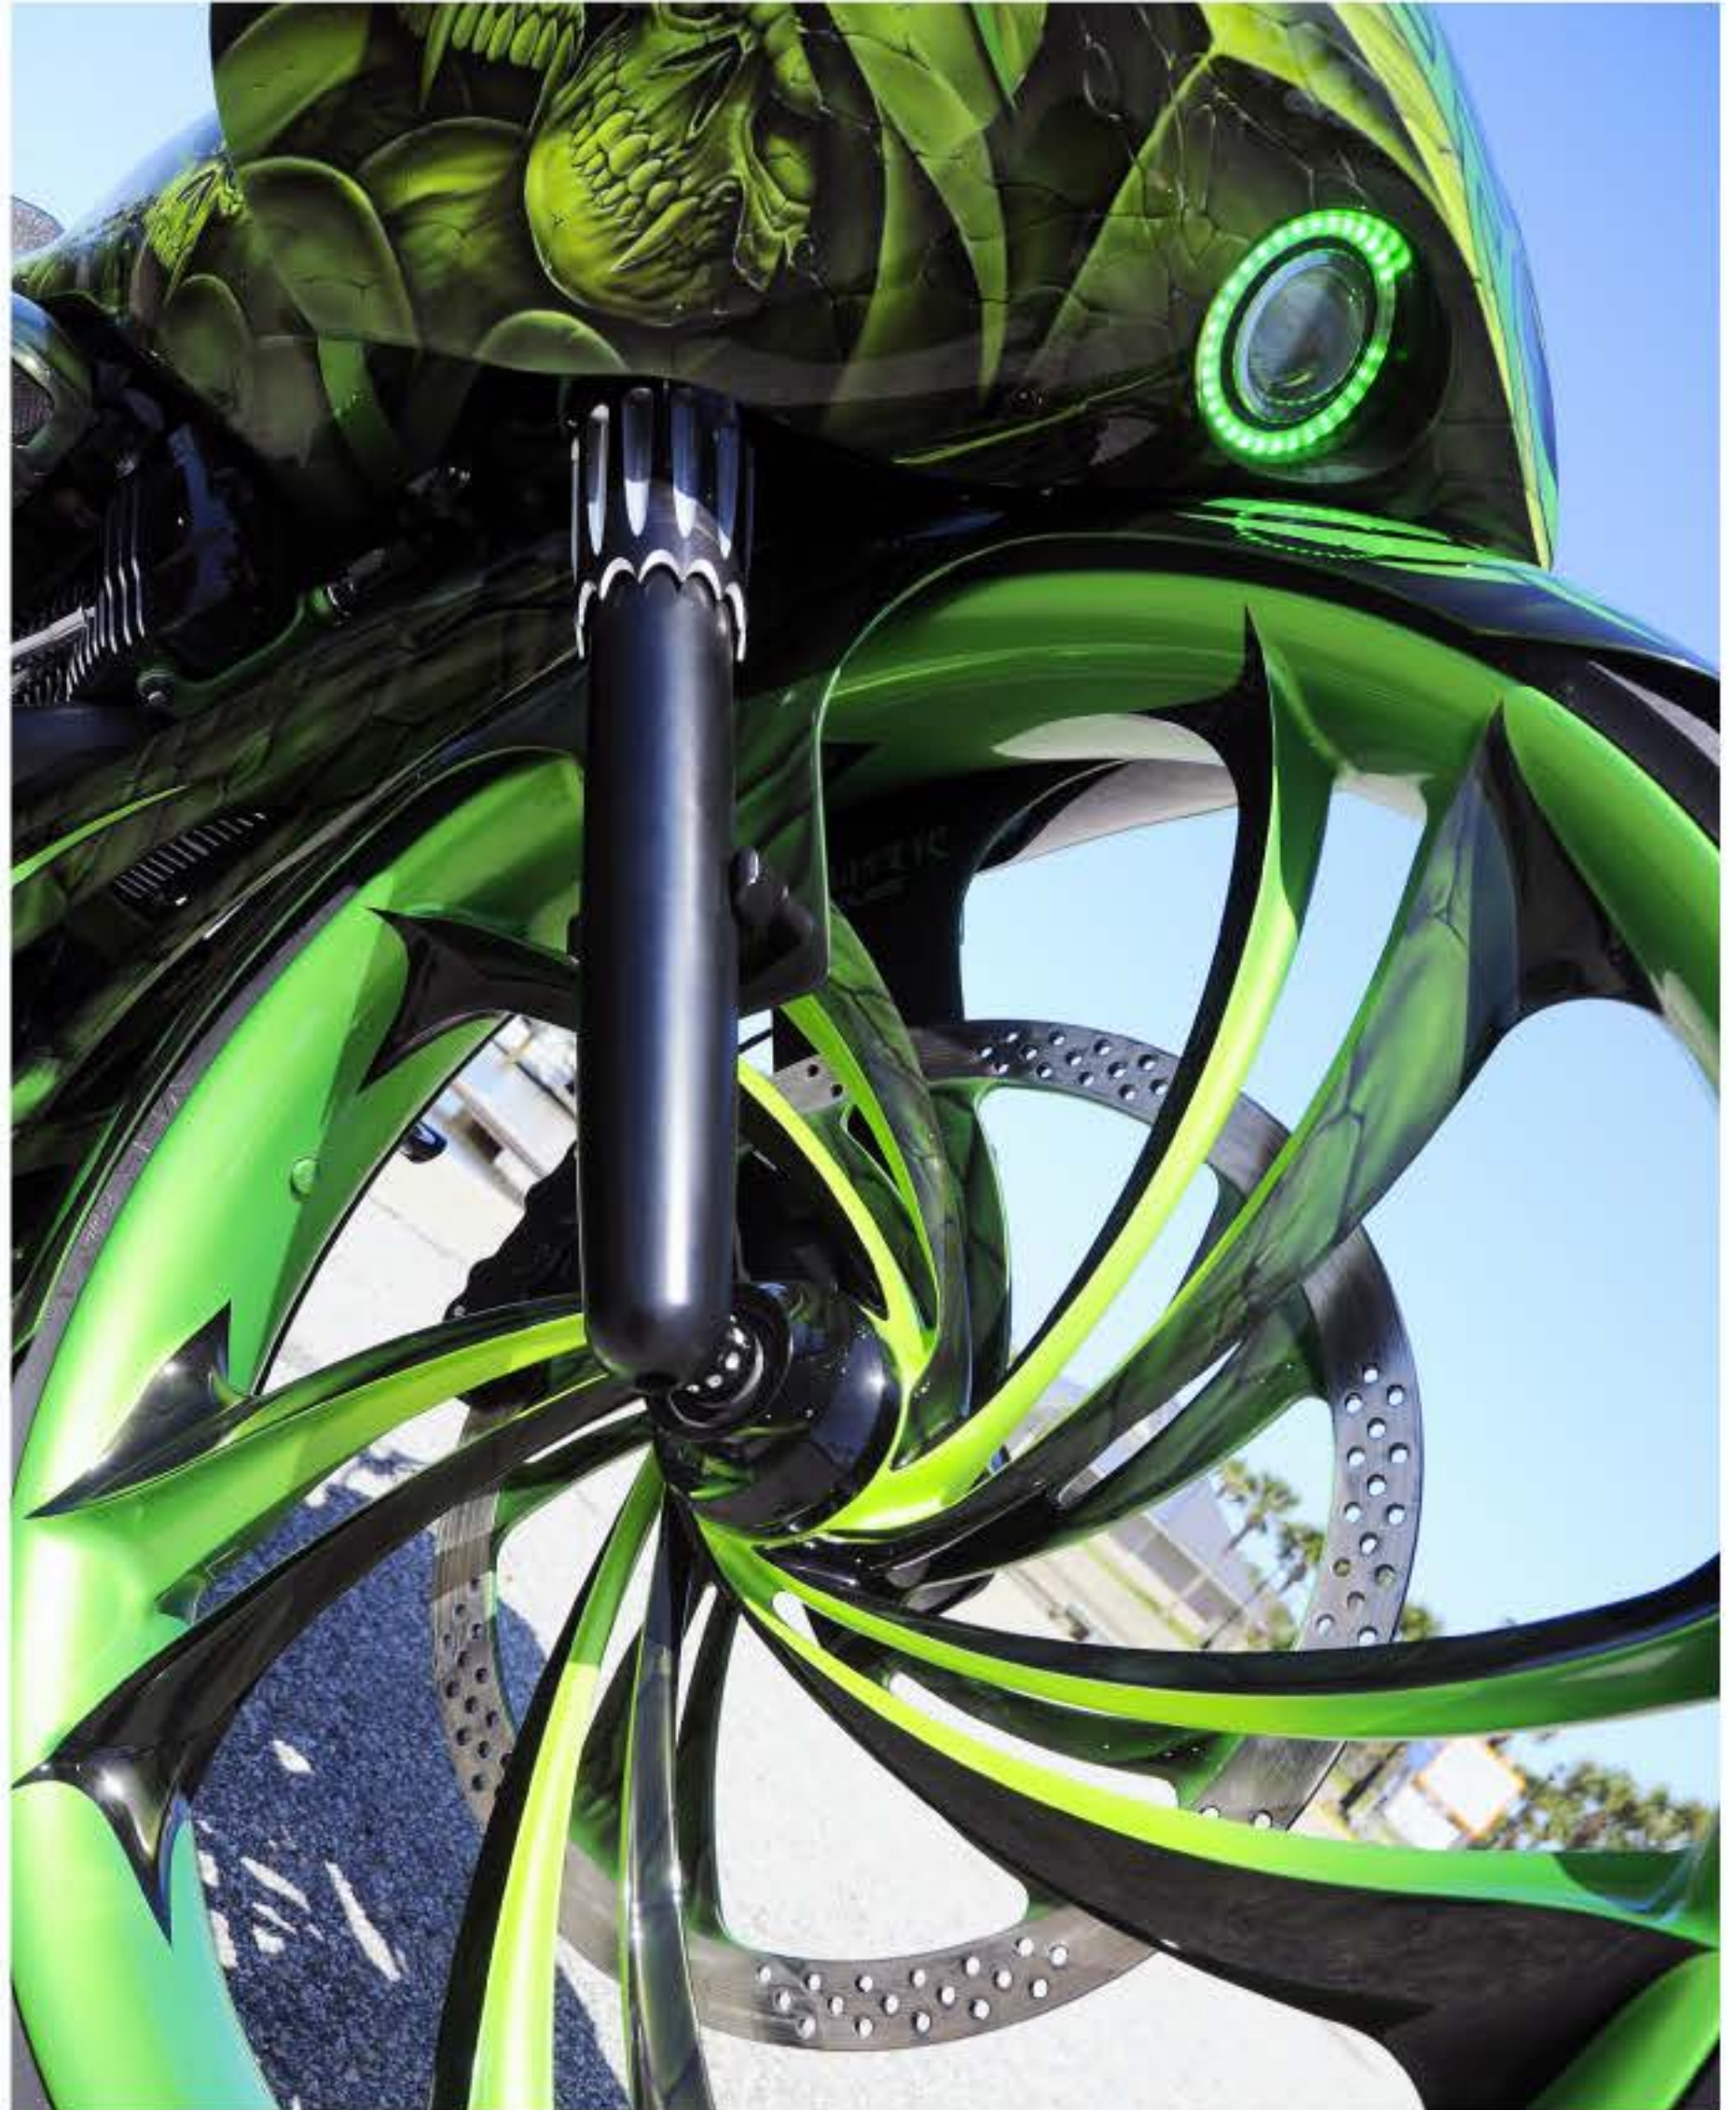

Ballistic Cycles is the first company that I remember building a Bagger with a 30" front wheel and taking the industry by storm. You would think a ground-breaking custom shop like theirs would be based in L.A., Phoenix or Florida, not in the tiny town of Blue Mounds, a suburb of Madison, WI. Business must be good; they just moved to a new 10,000 square foot facility.

Ravenous was built on a '08 Road Glide chassis. The Bagger was built as a shop mule, a bike that is used to R&D new parts. Most of the parts on Ravenous ended up in production. Ravenous could be recreated using the Ballistic catalog, with the exception of the fairing, which is a one-off with a lot of hours of customizing involved. A similar fairing is now available as a production piece.

Ravenous is powered by a 96" Twin Cam motor that received a Ballistic-modified Vance & Hines air cleaner and Vance & Hines Big Radius exhaust. The neck rake was increased to 50 degrees with an additional nine degrees of rake in the

RAVENOUS

triple trees. Air suspension has been installed on both the front and rear. A Doug McGoon 30" wheel rides on the front with a matching 18" rotor and a Performance Machine six-piston caliper providing the stopping power.

The handlebars are Ballistic Road Glide Relaxer Bars and feature internal throttle-by-wire. They are designed to accommodate different sized riders and the various arm lengths out there. The grips are from Performance Machine and the hand controls are from Arlen Ness. The stock gas tank has been covered with Ballistic Tank Sides and is affixed with automotive epoxy. You get the stretched custom look without welding, cutting or relocating the tank. A custom dash panel and a Ballistic seat that was covered by Alligator Bob with Italian leather,

stingray and custom etching, round out the tank. A B'Cool fender covers up the 30" front wheel and a Ballistic-modified Nasi fender sits on the rear with a Nasi taillight/license plate mount. Audio was upgraded with an Alpine head unit and amp. The amp is located in the fairing. The floorboards are from Paul Yaffe as are the passenger pegs. The foot controls are from Arlen Ness. The horn cover is a modified Vance & Hines air cleaner. Dakota Digital supplied the LED gauges and the stretched saddlebags are straight out of the Ballistic catalog. Daniel Bueso applied the green and black paint with skulls, scales and the underworld. Whether you are looking to have a custom Bagger built or need the parts to build it yourself, Ballistic can be reached at Ballisticcycles.com. 🏍️

TECH SPECS

BACKGROUND INFO.

Owner: Ballistic Cycles
Bike's Name: Ravenous
Brand Name: Harley-Davidson®
Model: Road Glide
Year: 2008
Fabrication/Assembly: Ballistic Cycles
Build Time: 2 Months
Paint/Graphics: Daniel Bueso
Color/Graphics Description: Green & Black/
Skulls, Scales & Underworld Theme

MOTOR SPECS

Year: '08
Manufacturer: Harley-Davidson
Model: Twin Cam
Displacement: 96 cu. in.
Air Cleaner: Ballistic-Modified Vance & Hines
EFI/Fuel Management: H-D
Exhaust: Vance & Hines Big Radius

TRANSMISSION

Year: '08
Manufacturer: Harley-Davidson
Shifting: 6-Speed

FRAME

Year: '08
Manufacturer: Harley-Davidson
Model: FLTR
Suspension Type: Air Ride

FORK

Year: 2010
Manufacturer: H-D/Ballistic Modified
Style/Type: Air
Sliders: Bagger Nation

WHEELS & BRAKES

FRONT/Size: 30"
Wheel: Doug McGoon
Tire Size: 140/40-30
Brake Caliper: PM
Brake Rotor: Doug McGoon 18"
REAR/Size: 16"
Wheel: H-D
Tire Size: 150/80-16
Brake Caliper/Rotor: H-D

ACCESSORIES

Handlebars: Ballistic Road Glide Relaxer Bars
Risers: H-D
Grips: PM
Hand Controls: Arlen Ness
Fairing: Ballistic Paradigm
Headlight: Ballistic
Taillight: Jim Nasi
Additional Lighting: Ballistic LED Angel Eyes
Halo Rings
License Plate Mount: Jim Nasi
Mirrors: Arlen Ness
Saddlebags: Ballistic
Seat: Ballistic/Covered by Alligator Bob
Gas Tank: Ballistic
Front Fender: B`Cool
Rear Fender: Nasi/Ballistic Modified
Gauges: Dakota Digital
Footboards: Bagger Nation
Foot Controls: Arlen Ness
Passenger Pegs: Bagger Nation
Sound System: Alpine
